#### WORLDWIDE RECOGNITION

Our products are sold in more than 50 countries worldwide, indicating that our products are globally recognized.

### WIDE RANGE OF SPORTS EQUIPMENT

At SELECT, you'll find EVERYTHING FOR YOUR CLUB. We have a wide selection of balls, sportswear, sports care, training equipment, and sports accessories, catering to all ages and levels.

### **HIGH QUALITY PRODUCTS**

Our constant focus on product development ensures that our products can withstand the demands that come with intense sporting activity. For us high quality means good durability, good playability, and comfortable products.

### PROFESSIONAL SUPPORT

We are the official match ball sponsor in several major football, futsal, and handball leagues worldwide and thus our balls, and other products, are used by the best professionals everyday all year round.

#### **SOCIAL VALUES**

We take our social responsibility seriously. We donate a large number of balls to charitable projects every year. Additionally, we have our SAHEP program, ensuring proper conditions for our stitchers working for the factory in Pakistan and their families.

### SUSTAINABLE VISION

We actively work to reduce our environmental impact and manufacture products with care for the planet. We produce balls from recycled plastic bottles, clothing from recycled materials, and cones from recycled plastic.

### INNOVATIVE APPROACH

We always strive to develop the best products for athletes. Therefore, innovation is a major focus for us, constantly looking at how we can improve our products or even invent new ones.

### **UNIQUE CUSTOMER SUPPORT**

We offer unique customer support, which makes us a preferred partner by numerous international distributors, federations of all types and sizes, clubs and shops on all levels – reliability and trustworthiness are words that are often used to describe SELECT.

# WHY SELECT FOOTBALLS ARE PLAYER'S CHOICE™

### **HIGHEST QUALITY**

At SELECT, we create footballs of the highest quality. For us high quality means: best durability, best playability, best touch, and most predictable and straight flight – we never compromise on this!

### **BEST MATERIALS**

For making the best balls, you need the best materials. We constantly search the market for the best available materials – and we use them. Without compromises.

### **FOOTBALL FOR ALL PURPOSES AND LEVELS**

With us, you'll find footballs for top professional level, club level, street football, skill training, indoor football, artificial grass, youth football, and leisure football. We probably offer the widest and most advanced ball range that is available in the market.

#### RECOGNIZED BY MAJOR FOOTBALL LEAGUES

We are the official match ball sponsor in several major football leagues and thus our footballs are used and tested by professional players day in a day out.

### PRODUCTION EXPERTISE

We use all modern and up-to-date production methods available, and we are always in front when it comes to optimizing and developing balls and materials.

### **UNIQUE CO-OPERATION**

As the only international ball brand, we work with only one supplier and our supplier only makes balls for us. This exclusive co-operation has existed since 1977 and ensures that our common know-how and R&D can only be used for our brand.

#### INNOVATIVE INVENTIONS

In 1962, our founder, Eigil Nielsen, developed a football with 32 panels – a revolutionary design in the football world. The 32-panel ball has an optimal roundness, ensuring a straight and predictable flight. Football players have appreciated the invention of the 32-panel football ever since and innovating the football is still a major focus and a core value for us.

### **ENVIRONMENTALLY FRIENDLY FOOTBALL**

Our PLANET football is partially made from recycled plastic bottles. It also uses natural latex. This means that approximately 60% of the ball consists of natural and recycled materials. We constantly look for ways to optimize the environmental impact in the production.

### **WE ARE EXPERTS**

In all modesty, we consider ourselves as ball experts. We have several people working only with ball production and development, just to ensure that even the smallest detail of a ball is as perfect as possible.

### **TESTS FOR PERFECTION**

All our balls are well tested before they enter the market – first, the balls are tested thoroughly by players and clubs in the development phase. After production, the balls are tested thoroughly in quality control before they are released for sales. We spend a lot of resources with testing in order not to compromise on what we deliver.

# **INSPIRED BY 60 YEARS OF BUNDESLIGA!**

These are the DERBYSTAR by SELECT official Bundesliga match balls for the 2023/24 season

On the occasion of the 60th anniversary of the Bundesliga, the sports goods manufacturer from Germany was inspired by the look of classic footballs balls from the beginning of the Bundesliga when creating the design and reinterpreted it for the new official match ball. While in the past the 12 pentagons were monotonously black, DERBYSTAR has upgraded them with dynamic design elements and eye-catching colors to create an innovative look for the new official match ball.

OFFICIAL PARTNER

### First Official Bundesliga match ball partly produced of recycled material

An innovation is hidden in the material of the new ball: For the first time, recycled material is used in the production of an official match ball of the Bundesliga. In total, around 10% of the new Official Bundesliga Match Ball is made from recycled polyester by weight.

# **NEW MONACO COLLECTION**

Welcome to our brand-new Monaco 2024 collection – our most exclusive player and training wear.

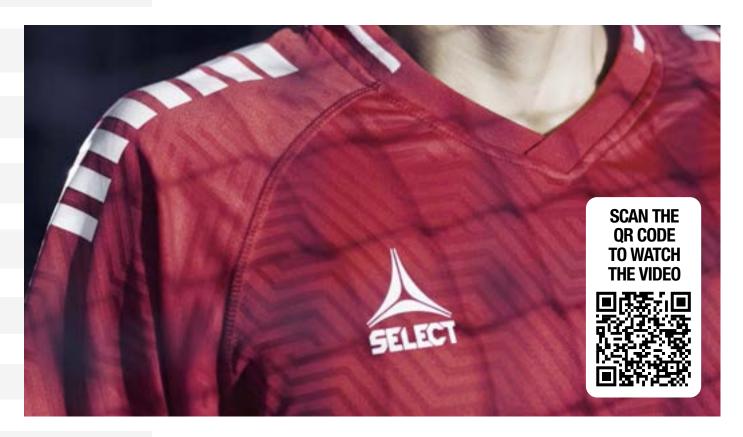

This high-quality collection of player and training wear pays homage to the modern sports universe, where style meets functionality.

In our pursuit of incorporating more sustainable initiatives, we have, as a novelty, ensured that all products in our Monaco 2024 collection contain recycled polyester. Some products are made entirely from recycled polyester, while others are partially composed of it.

This collection encompasses everything from our tailored player and training gear to specially designed outfits for coaches and team leaders, as well as leisurewear – and

each garment is a manifestation of our dedication to quality and performance. We've also included a stylish rain kit that combines practicality with an elegant aesthetic.

Regardless of the weather conditions, our clothing can handle it. Our player jerseys and shorts are not only quick-drying and breathable but also lightweight and made from durable materials. This makes them suitable for both football and handball, ensuring that players can perform at their best without compromising on comfort. But it doesn't stop there. We've elevated the design in this collection to new heights. A fresh pattern has been integrated into our player kits, and the color palette has received a creative lift compared to our previous collection. Now, there are even more options, allowing each team to express their unique style on the field.

## **LEGENDARY SINCE 1947**

SELECT Sport was founded in 1947 by Eigil Nielsen, goalkeeper for the Danish national football team, who devoted his life to create the perfect ball. The name of the company was given because of the exclusive leather that was specially selected for the ball production.

By producing many of the ball industry's groundbreaking creations such as the first laceless football, the first ball with 32 panels and balls made of synthetic leather, SELECT naturally became a trendsetter.

Back in 1951, SELECT signed a contract to supply balls for the Danish national football team, and in 1957 SELECT was appointed official supplier by the Danish Handball Federation. These partnerships have continued ever since and are some of the longest in the history of sport. A large number of agreements with both remarkable football and handball federations, clubs and players have since been made.

Today, SELECT is known as the ball specialist. Our footballs, futsal balls and handballs can be found in more than 50 countries, and we are the world's largest supplier of handballs. More than four million different SELECT balls are produced each year through a close cooperation with Anwar Khawaja Industries in Pakistan.

We have been developing balls for 75 years, and the passion for innovative craftsmanship still lives on in our daily work. Football, futsal and handball matches around the world are played with balls built on Eigil Nielsen's original principle of 32 panels, just as most balls produced worldwide are based on SELECT's inventions.

# THE ORIGINAL 32 PANEL BALL CONSTRUCTION

Every single football, handball and futsal ball from SELECT is based on the revolution from 1962, where our founder, Eigil Nielsen, invented a ball made of 32 panels. The overriding desire was to create the most reliable ball with the most predictable, straight flight and a bounce neither too high nor too low.

It was impossible to make a perfectly round ball with just 18 panels, which was the standard construction of a ball in the past. With the 32 panels – 20 hexagons and 12 pentagons - SELECT succeeded in creating the roundest ball ever seen. Later, a group of American scientists won the Nobel Prize for discovering that the molecules of carbon with a special irradiation organize themselves as a completely round ball – something Eigil Nielsen had already discovered and realized in his football with 32 panels, why the reinvention was named "the football molecule".

A ball with optimum roundness is essential to obtain reliable aerodynamic – a straight flight and a controlled bounce. Our finest football, BRILLANT SUPER TB, has been thoroughly tested in a wind tunnel at the Institute of Health & Sports Science at the University in Tsukuba, Japan. The results show that BRILLANT SUPER has a better aerodynamic than other top balls in the market. The ball's classic construction with 32 panels means that the ball meets resistance at a later point in its trajectory through the air, thus retaining a steady, high speed over a longer period of time. This provides a stable and more predictable flight – highly valued by all football players.

The majority of our balls are still based on Eigil Nielsen's original invention of the 32 panel ball construction, as we never compromise on quality, playability or durability.

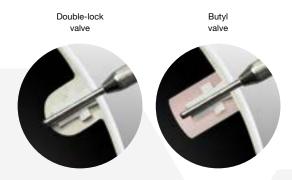

## **BLADDERS** & VALVES

Beneath the synthetic leather of our top balls, you'll find a Zero-Wing bladder made of natural latex with a built-in balance point opposite the valve hole. The concept has been developed to ensure not only the ball but also the bladder is as round as possible. On the outer side of the bladder, there is a lining of thick, exclusive foam material. The lining helps adjust the softness and enhances the contact between the ball and foot.

Inside our dual-bonded balls, beneath the synthetic leather, you'll find an SR (synthetic rubber) bladder that holds air excellently.

Our futsal balls have a different bladder to ensure the ball has the correct low bounce characteristic of a futsal ball. Hidden behind the elegant surface of the futsal ball is a specially developed butyl bladder with polyester fibers inside. This ensures a highly reliable low-bounce ball compared to a regular football, making it much easier to control and perfect for futsal.

The valve in our bladders differs from bladder type to bladder type. In a butyl bladder, the valve is made of butyl, while on latex and SR bladders, we use rubber valves. Our double-lock construction, where the air must pass through two "gates" to escape, exceeds FIFA's requirements for airtightness. In futsal balls, there is a foam lining around the valve on the inside of the bladder, ensuring that the fibers remain in the ball and do not get stuck in the valve, as this would compromise the ball's airtightness.

# HAND-STITCHED

With care and precision, the 32 panels are meticulously stitched together by hand, creating outstanding quality and durability. Each ball is the result of 630 double stitches and 60 corner stitches, carefully executed to ensure the ball's structure is solid and robust.

The culmination of this meticulous craftsmanship is a double knot that ensures the ball remains intact and retains its shape through intense use. This thorough approach to production ensures not only a longer lifespan for the ball but also consistent and reliable performance on the field.

TB stands for Thermo Bonding, an advanced method that uses heat and pressure to activate the adhesive bonding the 32 panels together. This means the ball is created without the use of stitches, resulting in a completely smooth surface and a more uniform ball.

This method not only serves to create a seamless construction; TB balls are also designed to effectively resist water absorption. The minimal water absorption helps preserve the ball's original weight, crucial for the gaming experience, especially in wet conditions. Players can trust that the TB ball maintains its quality and performance regardless of the weather conditions on the field.

The TB ball is crafted with attention to detail, delivering an impressive gaming experience that meets the highest standards in ball technology.

# **ULTRA ZONIC**

In 2021, SELECT set new standards in ball technology by introducing the world's first football manufactured using ultrasonic technology. Brillant Super UZ represents a groundbreaking construction method that is Danish-patented and unique worldwide. This method uses ultrasonic sound waves to weld the ball's 32 panels together.

During the manufacturing process, the ball's panels are held together under pressure while ultrasonic sound waves activate the microfiber molecules in the material. This is achieved by creating friction, resulting in a seamless fusion of the fields. This advanced method not only guarantees exceptio al durability but also ensures minimal water absorption. The ultrasonic welding technique is designed to keep the ball's weight stable, even in wet weather conditions.

SELECT's Brillant Super UZ is a masterpiece of technological innovation and Danish expertise, bringing a new dimension of performance and reliability to the football world. This ball is created for those who appreciate the best in sports equipment and strive for outstanding performances under all conditions.

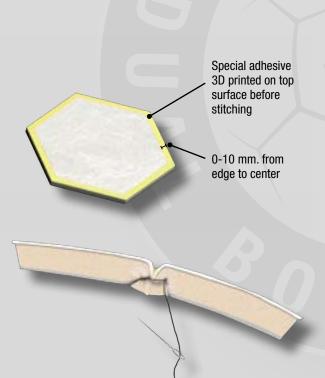

Our dual-bonded ball production method represents a technologically advanced approach to ball manufacturing that combines the best of both worlds. In this method, the ball's 32 panels are both sewn and glued at the edges. Each part of the ball is carefully assembled using 3 mm edge adhesive and stitches, ensuring a strong and durable construction.

In the heat mold, the ball undergoes a process where the adhesive is activated to conceal the stitches. This technique not only provides a smooth surface but also creates a more aerodynamic and uniform ball. Seam sealing is done manually, emphasizing SELECT's focus on craftsmanship quality and precision.

# THE FIRST FIFA QUALITY PRO APPROVED FOOTBALL, WITH A SENSOR INSIDE

### **SELECT Brillant Super iBall**

SELECT and German KINEXON have co-developed the intelligent SELECT Brillant Super iBall – a football with an integrated tracking sensor that will improve the football experience for everyone, as completely new data from football matches will now be available.

## THE WORLD'S FIRST INTELLIGENT HANDBALL ULTIMATE iBall

### INTELLIGENT SENSOR FOR AUTOMATED PERFORMANCE MEASUREMENT:

- Shot detection
- Shot speed
- Pass detection
- Pass speed

## ULTIMATE IBALL WITH A BUILT-IN CHIP THAT TRACKS AND DISTRIBUTES DATA IN REAL TIME

The ULTIMATE iBall is the world's first intelligent handball, featuring an embedded chip that tracks and distributes data in real-time.

The handball made its debut at the EHF FINAL4 in 2018. This was the first major event in European sports to utilize the new tracking technology, capturing precise ball speed, shot registration, shot position, and more. This data can be used to bring fans and media closer to the game.

In 2024, the ULTIMATE iBall will be used during the EURO tournaments for both men and women.

### **iBall TECHNOLOGY**

Spectators are able to observe the speed of the ball and the distance from goal for every shot in the game.

The shot distribution on court from one team or a specific player will be displayed for broadcasting and digital channels.

The position of every shot entering the goal will be displayed, illustrating scoring strategies. All information is detected automatically and in real-time with interfaces for both broadcast and digital channels.

### AN ANATOMICAL WORK OF ART

The top model 88 PRO GRIP consists of 3 mm Pro Tech Latex guaranteeing a perfect grip in all weather conditions. The latex is wrapped from palm to backhand maximising the catching area, and the negative glove cut provides constant latex contact between the hand and the ball. The soft airprene inside provides optimum comfort, increases the glove's flexibility and ensures minimal water absorption when playing in wet weather.

With the aid of an Anatomical Fit System the gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus ensuring comfort, flexibility and movement of the glove aligned with the speed of the fingers.

A wide wrist strap allows a feeling of stability and safety in the wrist. The wrist is asymmetric and has an elastic insert to ensure easy entry into the glove.

### Types of cuts

### **Negative Cut**

A popular glove cut choice that reminds of Flat Cut. This style of cut also has gussets between the palm and the backhand. The gussets of the 88 glove are also made of latex giving constant latex contact between the glove and the ball. Negative Cut fits snugger and the fingers are held in place giving optimal ball contact when catching. This is the most common cut among professionals.

### Flat Cut

Traditional glove cut with a flat palm construction providing a larger area of contact and making the glove more flexible. This style of glove typically fits looser than many other styles with more room for the fingers. Flat Cut is the most popular cut used for finger protection gloves.

### **INFLATING INSTRUCTIONS**

A SELECT ball will last a very long time if these instructions are followed

1. Straighten the ball out as best as possible.

2. Shake the ball so that the bladder is hanging loosely and vertically beneath the valve hole.

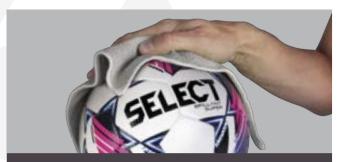

**3.** Allow 1 - 2 drops of SELECT valve oil to drip into the valve hole. Remember to oil the ball reYellowarly so that the valve doesn't dry out.

**4.** Inflate the ball with a SELECT pump. It is important that the bladder is in the vertical position as shown here. Always remember to use the nipple.

**5.** Use a SELECT pressure gauge to check if the ball has the recommended pressure (see recommendation on the ball).

**6.** Clean the ball with a brush and tepid water. Dry the ball with a cloth. Place the ball in a ventilated room with a temperature of 15 - 20°C.
